- During the early part of May 1996, I was told by several engineers, close associates when I believe to be raliable, that the Ministry of before was alerted concerning the over-flight of a formation of unknown flying objects, flying in an ensternly direction during that meach.
- 2 By friends related that hat appeared to be sircraft, flying in formation at an extremely high rate of speed at approximately twenty-five thousand maters, were observed by radar units of the free Air Defends Command. Bithing was done to disturb this flight, the probable reason being that the Some Air Defends Command and no weapons at its disposal to reach those introders.
- 3 During the same period, May and June 1970, many reports originating from all sections of Eungary cited the applicanance of "Hying Sources". For two or three weeks, reports appeared almost daily, describing these edjects as first-flying objects which could change direction of flight, secaleration and decolaration with weater same. By friends talk me of distinctions at the Mar Technical La-clitute is white Eungary's leading settems'relaws, engineers and technicalse town part, converning these objects. It was decided that they did not exist and test its anything, the reports were in 11-d by US propagation. As efficial communicated appeared in "Sucked Rep" declaring the extire "flying saucer" scare was a syth.
- An interesting of seriod of one of a, call-agua, however, was "Even if they are 2 exist, 1 hope they are on their way to both Hoscow."
